

Product: Virtual Cabinet

Build: 5.4

Release Items: 31

Fixes: 11

Enhancements: 20

© GetBusy Ltd 2023

This version of Virtual Cabinet uses **Microsoft Framework .Net 4.8**. **This must be installed prior to the upgrade** in order for Virtual Cabinet to work. For more information on preparing for this upgrade please see our website: <https://virtualcabinet.zendesk.com/hc/en-us/articles/4405088951697-Preparing-for-Virtual-Cabinet-5-1>

Best endeavours have been made to ensure this release is free of bugs and other defects. Testing and Quality Assurance processes have deemed the release as fit for purpose. However, not all environments and scenarios can be simulated. Any bugs or defects identified with this build should be reported via the [Support Website](#).

Area	Type	Id	Build	Details
General	New	VC-10152	5.4.1.155	Improve performance of loading large Packs Performance improvements when using packs with lots of documents in them.
	New	VC-1791	5.4.1.155	ReIndexing a document will now inherit Security Profile of the destination Cabinet/Folder/Section The Security Profile will now be automatically updated when ReIndexing a document to a new Filing Cabinet or Section. This ensures that security for the new Filing Cabinet, Folder or Section is enforced.
	New	VC-9816	5.4.1.155	Accessibility improvements • Unselected tabs in the Intry – darker colour, easier to distinguish selected/unselected tabs. • Keyword search box – more contrast, making it easier to see and read text. • Padlock icon next to indexes – changed icon and made colour darker so that it's easier to use. • Portal publishing... ○ More space for typing your message. ○ Make the document preview bigger. ○ More contrast on fields. • Text boxes and drop-down lists – more contrast and easier to use colours.

	Fix	VC-3585	5.4.1.155	OriginalFileName index default was truncating data OriginalFileName index will no longer truncate data when the name contains a file extension and special characters. E.g. "Report 31.07.21"
	Fix	VC-9871	5.4.1.155	Editing previous version Editing a previous version of a document with the Office Addin was causing a crash.
	Fix	VC-10392	5.4.1.220	VC Viewer error after Windows 10 Update Resolved crashing of the VC Viewer when certain Windows Updates were installed.
Document Creation	New	VC-1609	5.4.1.155	Start a Task from a Document Creation Template Associate a Document Creation Template with a Task so that the Task is automatically started when the document is created.
	New	VC-1902	5.4.1.155	Use File ID as a merge field in documents The File ID field can now be merged into documents created from document creation templates. This allows you to include the unique File ID of the document that is created within the file.
	Fix	VC-9976	5.4.1.155	Indexing a document creation document When creating a document from a template, some of the document creation fields were not properly passed to the indexing screen of the document, e.g. the client.
	Fix	VC-10690	5.4.1.223	Creating document with textboxes After a combination of an update to Word and VC 5.4 templates containing textboxes could not be created and would show the user an error.
Search	New	VC-9879	5.4.1.155	Keyword searching on words with special characters Keyword searching has been improved for words with special characters in them, e.g. 64-8.
	Fix	VC-9483	5.4.1.155	Document preview on first search The document preview is now appearing correctly after you've performed your first search after opening Virtual Cabinet.

Email	New	VC-10014	5.4.1.155	Indexing defaults for multiple filing cabinets Email indexing defaults can now be configured for multiple filing cabinets. This is useful if you are regularly indexing emails into multiple places, but still want to utilise the defaults, such as the email subject into the description. You can set one Filing Cabinet to always be selected by default. No change for existing users on upgrade.
	New	VC-9609	5.4.1.155	Re-named "Addin" tab to "Virtual Cabinet"
	Fix	VC-4395	5.4.1.155	Index email with long attachment name through Indexing Pane Emails with attachments that have a file name greater than 260 characters can now be indexed through the Outlook Indexing Pane.
	Fix	VC-9722	5.4.1.155	Open email with long attachment name Emails with attachments that have a file name greater than 260 characters can now be opened in the VC email viewer.
	Fix	VC-9876	5.4.1.155	Displaying special characters in email subjects Special characters (e.g. Fada characters) are now being displayed correctly in the email subject index field.
	Fix	VC-10408	5.4.1.220	Attach VC documents to an Email through the addin Attach a document from an Intry or Indexed to a Cabinet through the "Virtual Cabinet" button within an email. Some users were reporting an error.
Reports	New	VC-9438	5.4.1.155	Retention Report "Large documents" Display the total number of documents where the latest version of the document is greater than 100MB.
Admin	New	VC-9825	5.4.1.155	Change Virtual Cabinet username Virtual Cabinet administrators can change a user's username.
	New	VC-9787	5.4.1.155	Admin tab UI update New look, new feel. Admin tab icons and labels have now been updated.

	New	VC-9846	5.4.1.155	12-character new password requirement New passwords for Virtual Cabinet users now require a minimum of 12 characters. This does not affect existing passwords but will be enforced for new accounts and new passwords. This is in line with modern security practices.
	New	VC-9845	5.4.1.155	Case sensitive passwords Passwords now recognise case sensitivity to improve the potential complexity of passwords. All existing passwords are lower case.
	New	VC-9958	5.4.1.155	Inform user to update standard passwords Users will now be asked to update their Virtual Cabinet password to something more secure if they are using a standard password that came with the Virtual Cabinet install.
	New	VC-10223	5.4.1.155	Force Join Order – search query option New global setting to adjust how searches are performed on the database. Can improve performance at larger sites. Please speak to support before enabling.
Retention Policy	New	VC-4450	5.4.1.155	Retention Policy based on Deleted Date Create a Retention Policy to destroy documents based on the Deleted Date of a document. E.g. Destroy documents that were deleted more than 6 months ago.
	New	VC-6201	5.4.1.155	Retention Policy to destroy all old versions Create a Retention Policy to destroy all old versions of a document, leaving just the latest version. E.g. Destroy all old versions of a document if the document hasn't been modified in the last 12 months.
Integration	New	VC-9988	5.4.1.155	CabiBond username/password in command line CabiBond now accepts the username and password in the command line as well as the command file. This is easier and more secure for integrators.
System	New	VC-9981	5.4.1.155	Capture Service no longer needs a VC user The Capture Service no longer uses a Virtual Cabinet user to authenticate with the Virtual Cabinet Business Layer. Improves security, reduces setup requirements, and makes the system more reliable.

Virtual Cabinet Release Notes

New	VC-9986	5.4.1.220	Directory Monitor uses service authentication Directory Monitor now uses the hidden service account to authenticate with the business layer. You no longer need to add Virtual Cabinet credentials to the Directory Monitor Config Tool.
Fix	VC-10272	5.4.1.155	spFilesDetails deadlocks Sites with a large number of users were occasionally seeing deadlock errors when using Virtual Cabinet, related to the spFilesDetails stored procedure.
Fix	VC-9949	5.4.1.155	WIP deadlocks Sites with a large number of users were occasionally seeing deadlock errors when using Virtual Cabinet, related to returning Work in Progress documents.
Fix	VC-9833	5.4.1.155	Upgrade Lucene (content searching) Upgraded the database engine used for content searching. Numerous bug fixes.
